

Harnessing the power of the sun, the SolCool 2-Ton Hybrid AC System combines innovative design with proven technologies that deliver reliable comfort at a 75% or greater reduction in cooling costs. Plus, the SolCool system offers many benefits not available with conventional cooling systems. Add a 1.3kW SolCool Power Center for even greater reductions in your power bill and more energy security. It's like having 4kW on the roof!

### Buyer Benefits Include:

- New / Replacement / Augmentation applications
- Ability to expand & zone-out climate control
- Financing through [www.renewablefinancial.com](http://www.renewablefinancial.com)
- Significantly reduce power bills
- Fresher, conditioned indoor air quality
- Can be used as an alternative power supply
- Battery back-up with DC Lighting & Ceiling Fan options
- Extreme energy conservation & continued operation during power interruptions

The SolCool hybrid platform is a direct application, primary, augmentation and emergency back-up AC system. The energy savings of 12-volt renewable power with the security of 110-volt utility power make the SolCool Hybrid AC System incredibly efficient at a price that is comparable to conventional high efficiency systems units sold.
